Deployment on Hostinger — Six phases: server prep with k3s, secrets management, manifest apply order, TLS with Cert-Manager, Prometheus/Grafana observability, and autoscaling. Includes a full cost table showing ~$32/month for a production-grade Kubernetes deployment.

Financial Evaluation & Market Disruption — $68.4B TAM by 2032, four-tier revenue model ($99/mo to $500K/yr), a 5-year P&L projection to $98M ARR, and three disruption vectors: Compliance Layer, Liability Transfer Market, and the Trust Economy.

Complete Funding Package — $1.5M Seed on SAFE at $8M pre-money cap. Use of funds table, 18-month milestone map, competitive landscape, exit thesis ($1.5B–$2.5B), investor target profile, and a closing argument designed to end the meeting.
